PCT/IB04/00108

Box III TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

The technical features mentioned in the abstract do not include a reference sign between parentheses (PCT Rule 8.1(d)).

#### **NEW ABSTRACT**

A jackpot wagering system (1) includes a number of player terminals (3), a random event generator and an accumulation facility (7). Each player terminal (3) is operable by a respective player to place a corresponding wager on one or more different turns of a accumulation account; the random event generator (8) is activatable by placement of each wager to accumulate a portion thereof in an which an outcome of a turn of the game of chance is based, the outcome being one of a number of possible outcomes that includes a favorable outcome causing the player who placed that wager to win the contents of the accumulation account. The jackpot wagering system (1) also includes an enrolling means (21) capable of enrolling each player in a lottery during a predetermined time period as a function of that player's corresponding wagers on the one or more different turns of the game of chance.
